FYI—two weeks after Jared sent a letter to the Corps San Francisco District Engineer, we are still awaiting receipt of documents and have no definitive schedule for the Corps to provide them. I sent this follow up note to Colonel Morrow today. Jane

Thanks, John, for the very kind note on my retirement. In my final hours as a federal employee, I wanted to follow up on Jared Blumenfeld's April 16 letter (attached) seeking Corps documents in support of EPA's jurisdictional delineation for the Redwood City Salt Plant site. I understand Jason Brush spoke with Jane Hicks last week, and, rather than have us come to the Corps office, Jane agreed to compile and review the file in-house for any privileged material, and then send us directly what materials HQUSACE approves for release. We're scoping contracting tasks and need to know where the information gaps are, so I'm hoping this can be accomplished quickly.

It would be very helpful if you could provide incoming acting Water Director Nancy Woo, and Jason Brush, a schedule for EPA's receipt of these materials. Thanks very much - Jane
